4. Ambient Lighting
5. LED Dance Platforms
6. Interactive Plasma Monitors
7. Lounge Furniture
8. Photo Booth

The starting point for your event entertainment program will be the music. Your DJ is a master of all music genres and knows how to keep the crowd rockin' all night long.

High Tech Digital Sound System

Dance Floor Lighting

The background image shows a dance floor from an overhead perspective. The floor is illuminated with a vibrant blue light. In the center, there is a bright, circular area of light that fades into a darker blue towards the edges. The light creates a series of concentric, wavy patterns across the floor, suggesting a dynamic lighting effect. The overall atmosphere is energetic and modern.

These computerized lights will give you that NYC club feel. Our lighting technician will program them in various colors and patterns and set in sequences of motion custom tailored for your venue for optimal exposure. To create an outstanding show we suggest a minimum of six fixtures. These can be mounted on an overhead truss or vertical pillars. This will add huge amounts of energy on the dance floor.

Custom Monogram

The background of the slide is a photograph of a stage or event space. The scene is dimly lit with a strong blue color cast. In the foreground, there is a dark, reflective surface, likely a dance floor, where a large, glowing orange monogram is projected. To the left, there are several rectangular, illuminated structures that look like light fixtures or stage elements, also glowing with a blue light. In the background, there are silhouettes of people and structures, suggesting a party or event setting.

We will re-create your logo and display it in one or more of our lighting fixtures.. It is very cost effective way to incorporate the theme into the party. It's simple by nature and quite striking. We project the image on a walls, the ceiling and on the dance floor. Since it is installed in our computerized lights we can show the image in a number of colors, rotate the design, create prisms effects and move it in any direction or set in motion in any pattern.

Ambient Lighting

To completely change the vibe of the venue we suggest adding LED ambient lighting. These will illuminate all of the wall and transform feel of the venue with a burst of color and at the same time adding classic elegance. Our lighting technician will have full control over the colors to anything you could possibly imagine.

LED Dance Platforms

Our stages are steel framed and coated with white plexiglass. Included are 16 LED fixtures and a lighting technician to control the colors and patterns. A full set of stages includes two 24" tall and two 12" tall platforms. The photos speak for themselves!

Interactive Plasma Displays

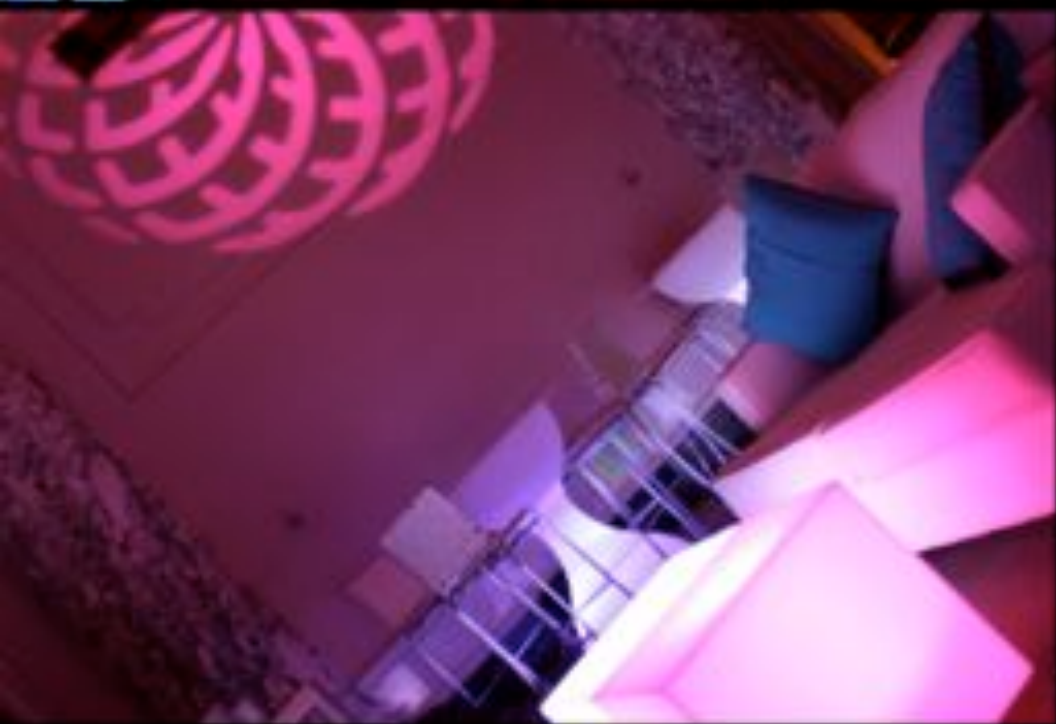

Our 60" Plasmas displays are fully interactive. On screen we will mix live footage of your guests dancing, 100's of still images taken live throughout the event (Zap Shots), graphic overlays and music videos from all eras. We can place these screen throughout your venue to bring the party to various sections of the ballroom.
